Abstract: Digital entrepreneurship is one of the most prominent types of entrepreneurships in today's world and this is considered a great way of developing entrepreneurial skills. The rapid growth of this research area has led to this study, which intends to explore the nascent field of Digital Entrepreneurship through an exhaustive Bibliometric analysis of globally published papers extracted from SCOPUS from 1993 to 2023, a summary of which is also given. An upsurge in the level of acceptability of the digital form of business can be witnessed among Western and Indian entrepreneurs. Future research questions have also been discussed, along with the conclusion.
